JASON ZHENG

631-569-6477 jasonzheng0814@gmail.com linkedin.com/in/zhengjason08/ github.com/zhengjason0814

EDUCATION

Stony Brook University **May 2026**
Bachelor of Science in Information Systems *Stony Brook, NY*
Georgia Institute of Technology (OMSCS) **Expected Fall 2028**
Masters of Science in Computer Science *Online*

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C++, C
Web Tech: Node.js/Express, React, FastAPI, Flask, Django, Angular, Vue, Next.js
Data and ML Tech: SQL, PostgreSQL, MySQL, MongoDB, Pandas, Scikit-learn, NumPy, PyTorch, TensorFlow
Cloud and Tools: Git, Docker, Kubernetes, Linux, AWS (Certified Cloud Practitioner)

EXPERIENCE

Stony Brook University (MARCOM Department) Sept 2025 – May 2026
Front-End Web Development Intern *Stony Brook, NY*

- Boosted accessibility and usability by **25%** for **40,000+** monthly users across **5+** university web platforms by engineering responsive, high-traffic web applications using HTML, CSS, JavaScript, and Bootstrap.
- Reduced redundancy **30%** and improved efficiency across all department sites by designing **15+ reusable CMS components.**
- Implemented **WCAG 2.1-compliant accessibility** standards across pages, ensuring consistent experiences across devices.

REBNY Jul 2024 – Aug 2024
Software Engineering Intern *Manhattan, NY*

- Reduced inbound support tickets **25%** and saved **47+** hours of manual inquiry handling over **2 months** by constructing a full-stack AI-powered chatbot using Python and the OpenAI API.
- Decreased response time **35%** and improved answer relevance through a **RAG** pipeline using **embeddings** of FAQ datasets.
- Improved onboarding efficiency and long-term maintainability by collaborating in an agile environment to develop and iterate on features, authoring technical documentation.

PROJECTS

Bread | *Plaid, React, Node.js/Express, MongoDB, Python/FastAPI, Redis, Docker, AWS S3, Numpy, Scikit-learn* Jul 2026

- Delivered a finance app that pulls and auto-categorizes **15,000+** bank transactions **per minute**, spanning **27 REST API endpoints** across **4** containerized services via incremental **Plaid** sync.
- Categorized transactions into **16 categories** with **94%** accuracy and flagged anomalies at **98%** precision through a machine-learning **microservice** using TF-IDF classification, gradient-boosted quantile regression, and robust z-scores.
- Cut response time **46%** on repeated ML and exchange-rate requests with Redis TTL caching, and guarded endpoints against overload with **rate limiting.**

LiftSafe *(3rd HopperHacks 2026)* | *Python, TypeScript, React, OpenCV, GeminiAPI, ElevenLabs, Google Mediapipe* Feb 2026

- Built a real-time computer vision system using OpenCV, MediaPipe, and React, delivering live fitness form correction with multi-language voice feedback for **50+ test users**.
- Achieved **92% pose detection accuracy** during testing by applying angle smoothing to reduce noise in joint tracking.
- Built a **parallel** pipeline converting **30+ FPS** video into ElevenLabs audio feedback, cutting delay **40%** vs. sequential calls.

Chatty | *React, Node.js, Express, MongoDB, Tailwind* Jul 2025

- Developed a real-time communication platform for language learning users, delivering **1,100+** messages and **75+** video calls.
- Improved performance by caching with TanStack Query, reducing API refetch time by **35%** for returning users.
- Secured user sessions with JWT and Bcrypt, integrating GetStream API for real-time messaging at <**200ms latency**.

LEADERSHIP

Theta Tau Professional Engineering Fraternity Nov 2023 – May 2026
Web Development Head

- Led **4** engineers in 2-week **Agile** sprints to build a MERN platform for **50+** members, cutting feature delivery time **25%.**

Fujianese Culture Club Aug 2024 – May 2026
Treasurer

- Secured **$8,000+** in sponsorships and the club's first-ever university budget by leading financial presentations.
